01 // PROFESSIONAL SUMMARY

Full-Stack & AI Systems Engineer with proven experience architecting, building, and shipping production-ready SaaS platforms, autonomous AI workflows, and resilient cloud infrastructures end-to-end. Specialized in RAG pipelines, LLM agent integration, real-time booking automation systems, and high-performance modern web architectures.

02 // SHIPPED FLAGSHIP SYSTEMS

iRepair Dashboard

[LIVE IN PRODUCTION]

AI Booking & Business Management Platform for Service Shops

- Engineered a production-ready multi-tenant booking and management platform serving live client traffic.
- Implemented a 24/7 AI booking assistant capable of conversational flow, real-time slot validation, and multi-lingual support (English, Urdu, Roman Urdu).
- Built an integrated owner dashboard for live lead pipeline tracking, service dispatch, and automated customer notifications.

AI Tutor for Class 10 (Textbook-Aware RAG Platform)

[IN ACTIVE DEVELOPMENT]

Matric-Focused Intelligent Learning & Retrieval Engine

- Designed a textbook-aware RAG pipeline utilizing OCR extraction, intelligent chunking, and pgvector embeddings for chapter-based Q&A.
- Built automated quiz generation, concept synthesis engines, and step-by-step problem-solving agents.

Autonomous AI Workflows & Business Automation

[ENTERPRISE SYSTEMS]

Custom AI Agents & Backend API Integrations

- Developed autonomous chat agents, lead capture webhooks, and custom vector search tools that sit inside real operational business workflows.
